

Postnatal Diet Plan (Normal) (Non-Vegetarian)

Nutrient-Rich Diet for Post-Delivery Recovery & Breastfeeding Support

Core Dietary Principles

- Focus on iron-rich and calcium-rich foods to replenish nutrients lost during delivery and support lactation.
- Include galactagogues daily: fenugreek (methi), fennel seeds (saunf), oats, garlic, and gond laddoo.
- Eat 5-6 small meals daily with adequate protein and healthy fats for breastfeeding energy needs.
- Stay well-hydrated with 10-12 glasses of water, coconut water, buttermilk, and herbal teas daily.
- Prefer warm, easily digestible foods like khichdi, soups, dalia, and porridge in the early weeks.
- Avoid cold foods, gas-forming foods (cabbage, cauliflower), raw salads, and spicy/oily foods initially.

7-Day Meal Plan

Day 1 (Monday)			
Breakfast: Ragi porridge + ghee + 2 boiled eggs + 5 almonds	Lunch: 2 roti + ½ cup lauki sabzi + fish curry (100g) + curd	Snack: 1 cup fenugreek tea + 1 gond laddoo + 1 banana	Dinner: 1 cup moong dal khichdi + ghee + ½ cup raita
