

## Pregnancy Diet Plan (Non-Vegetarian)

Nutrient-Dense Diet for Maternal Health & Fetal Development

### Core Dietary Principles

- Ensure adequate folate, iron, calcium, protein, and DHA for healthy fetal brain and spine development.
- Eat small, frequent meals every 2-3 hours to manage nausea, heartburn, and maintain stable energy.
- Pair iron-rich foods (green leafy veg, lentils, beetroot) with vitamin C (lemon, amla) for absorption.
- Stay hydrated with 8-10 glasses of water, coconut water, buttermilk, and fresh fruit juices daily.
- Avoid raw/undercooked meats, raw eggs, unpasteurized dairy, excess caffeine, and alcohol completely.
- Take prescribed prenatal supplements (folic acid, iron, calcium, DHA) as advised by your doctor.
