

## Weight Loss Diet Plan (Non-Vegetarian)

High-Protein, Low-Carb Diet for Healthy Fat Loss

## Core Dietary Principles

- Create a moderate calorie deficit (1200-1500 kcal/day) while maintaining protein to preserve muscle mass.
- Include lean protein at every meal — dal, paneer, soya, chicken, fish, eggs — to boost metabolism.
- Replace refined carbs with complex carbs: brown rice, quinoa, millets, whole wheat, high-fibre veggies.
- Avoid sugar, sugary drinks, packaged snacks, fried foods, and all refined flour products completely.
- Drink 8-10 glasses of water daily including 1 glass before meals to reduce overeating.
- Eat every 3-4 hours with portion control. Dinner should be the lightest meal, 2 hours before bed.
